-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4 & 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaufman 5,934,551.

Kaufman shows a package including a top, first side, bottom, second side, an internal separator 79 which forms internal compartments, and windows 94 for viewing the contents of the compartments. Kaufman does not disclose that this container could be used to collect a vial, but it

includes all features claimed and could be used for this purpose with no structural change. The separator is broadly considered to "hold" the contents.

Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Petrelli et al 6,871,778 (newly cited).

Petrelli shows a container formed by folding a single sheet, including a top, first side, bottom, second side, internal separator 26, and retainer 24 within the container.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6, 8, & 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petrelli et al in view of Kaufman.

Petrelli shows a container having a top, bottom, sides, internal separator 26, and retainer 24, but there does not appear to be windows to view the contents of the container. One would recognize that it would be desirable to provide windows in the wall of a container to enable a user to view the contents. For example, Kaufman shows that a container may include an internal separator 79 which forms compartments, and windows 94 to view contents of respective compartments. These windows would be desirable in the container of Petrelli to allow one to view the contents. It would have been obvious to one of ordinary skill in the art to provide the container of Petrelli with windows, as suggested by Kaufman.

Claim 12 is allowed.

* * * * *

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references show containers with windows.
